

Project Fact Sheet

Updated: March 2007

Mobility Management Development and Research Dissemination (MOVE)

Programme area: STEER, VKA9
Status: Ongoing

Coordinator: Hannele Johansson
Energy Agency for Southeast Sweden
E-mail: hannele.johansson@energikontor-so.com
Tel: +46 470 72 33 25

Partners: Energy Agency for Southeast Sweden, Sweden
Klimaschutzagentur Region Hannover GmbH, Germany
Tipperary Energy Agency Ltd., Ireland
Energy Centre Bratislava, Slovakia
Ente Vasco de la Energia, Spain
Energy Agency of Plovdiv, Bulgaria
Agenzia Locale per l'Energia e lo Sviluppo Ambientale della Provincia di Chieti A.L.E.S.A. Srl, Italia

Website: <http://www.move-project.org>

Objective: Contribute to the reduction of greenhouse gas emissions through awareness rising and good examples

Benefits: Project partners will acquire the tools, skills and the platform needed for work with transport.

Keywords: Mobility management and environment

Duration: 01/2006 –12/2008

Budget: € 643 236 (EU contribution: 49.26%)

Contract number: EIE/05/186/SI2.421633

System for Evaluation
of Mobility Projects

Based on MOST-MET

Short description

MOVE is built on the partnership of 7 European energy agencies that will acquire the skills, the tools and the platform needed for the work with transports. By carrying out projects on local level they will give input to some Good examples.

In 2006, the partnership built a common platform for their future work based on training in Mobility Management through e-ATOMIUM and a decision to use the Swedish SUMO-model for the evaluation of their local projects.

The major events open to all will occur during 2007:

- “Clean movers” a Regional Conference in Hannover, Germany 17th April 2007 during the Hannover fair
- “MOVE(ing) forward with SUMO” – Planning, evaluating and managing projects with SUMO – a tool for systematic evaluation of Mobility projects based on MOST-MET in Växjö 9th May 2007 during the Sustainable Regions and Municipalities Conference 2007.

For more information, please visit the project home-page www.move-project.org.

Expected and/or achieved results

- A Mobility Management Network Cluster in form of an Internet site for dissemination of Best practices and information exchange between the project partners
- Indicators based on SUMO/MOST-MET

- Mobility Agencies or similar platforms that will act as information and promotion centres and carry out projects addressing to local authorities, companies and other stakeholders
- Good examples and Best practices to give inspiration and guidelines for further work within Mobility Management in the participating regions

Lessons learnt

Although the project has not been completed it is possible to draw the following preliminary conclusions:

A good evaluation method offers improved project planning and helps in setting relevant goals. Evaluation gives opportunity to:

- Compare with targets
- Compare with others
- Learn from results

Make sure that you have the commitment of local key actors before the project starts.
